DETAILED ACTION

Status of Claims

1. This communication is responsive to Appeal Brief filed on March 23, 2007. Claims 1-3,5-28,31 and 32 are pending and are thus allowed.

Response to Arguments

2. Applicants arguments presented in Appeal Brief filed on 3/23/2007 are found to be persuasive.

Allowable Subject Matter

3. Claims 1-3,5-28,31 and 32 are allowed.
4. The following is an examiner's statement of reasons for allowance: Applicants invention of enabling remote control of a UNIX-based machine based on prompting, is found to be patentable. Prior art references found to be pertinent to Applicants disclosure (particularly Patent Numbers: 6,895,588, 7,100,069, and Non-Patent Literature "Virtualization, Emulation, and Remote Control Solutions: Running Windows by Remote Control"), either only teach minor aspects of the invention or only teach the general environment of the invention. The prior art, neither singly or in combination, do not teach the claim limitations.

The particular novel feature of the invention (as mentioned in the claims) is enabling the remote control of the UNIX-based machine via a prompt wherein the prompt is inserted into a replicated screen. The replicated screen is a replication of current contents of a display screen visible to a user. A prompt is inserted into this replicated screen which would enable a user of

the UNIX-based machine to grant permission for a remote device to control the UNIX based machine. After which the replicated screen, which has the inserted prompt, is then made visible to the user of the UNIX-based machine.
